

# РАБОЧИЙ ЛИСТ \_\_\_\_\_

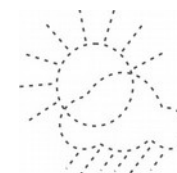

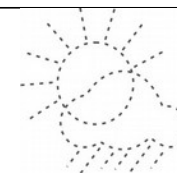

(фамилия, имя)

«Погода» на уроке ☺

ПОГОДА — \_\_\_\_\_

(что это?)

(дополнительные признаки)

## АУДИРОВАНИЕ

Dry and cloudy

Windy

Cloudy and sunny

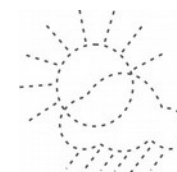

Rainy

The weather in the north is \_\_\_\_\_

The weather in the east is \_\_\_\_\_

The weather in the west is \_\_\_\_\_

The weather in the south is \_\_\_\_\_

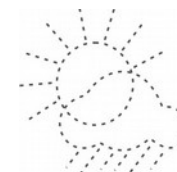

БАРОМЕТР

(ненужное зачеркнуть)

ТЕРМОМЕТР

Зачем нужен этот прибор?

## Meteorological (weather) station

To describe the weather people use information about temperature and air humidity, air pressure, the direction and speed of wind, the number and types of clouds and dangerous atmospheric phenomena.

Meteorological or weather station consists of two parts: meteorological site and meteorological cabin. There is a weathercock and snow-rain recorder (osadcomer) on the site and thermometer and barometer in the cabin.

air humidity – влажность воздуха

phenomena – явления

site – зд. площадка

cabin - зд. Будка

Зачем нужна метеорологическая станция?

What parts does Meteorological station consist of?

Какие приборы находятся на метеостанции?
